Iteration 2 - Work Breakdown
- Team
  - Design state diagram together + design basic idea of classes
  - Add new classes to UML that each person creates
  - Debug code
- Aashna
  - Implement State pattern
  - Design Elevator+State pattern in more detail
  - Merge + Test code together
  - Come up with test cases
- Krishan
  - Adjust the elevator class + middleMan to use the state pattern
  - Design Elevator+State pattern in more detail
  - Sequence diagram
  - Clean up elevator state diagram
- Yuvi
  - Write JUnit test cases
  - README.MD
- Dani
  - Clean up UML Diagram (Combine new Elevator + Scheduler UMLs) + add a description
  - Clean up Scheduler State Diagram
  - Scheduler class
  - Pair Programming Scheduler
- Abdalla
  - Clean up Scheduler State Diagram
  - State pattern for Scheduler
  - Pair Programming Scheduler
- Isaac
  - Come up with test cases
  - Add to UML
